ECS 140A Programming Languages
Course Logistics

Aditya Thakur

Carefully read the course syllabus on Canvas.

- Pre-recorded lecture videos uploaded to Canvas
  - Mix of new videos and edited videos from previous offering of the course

- Post questions and clarifications on Piazza
  - You are encouraged to answer questions posed by other students.

- Signup for online office hours on Zoom if Piazza is not sufficient
  - Book appointment slots using Google Calendar

Grading

- Review quizzes
- Assessment quizzes
- Programming Assignments

- Review quizzes
  - Open for a week and you can take them multiple times
  - Multiple-choice questions

- Assessment quizzes
  - Available on Canvas for 24 hours and can be attempted only once.
  - Once you begin, you will have 30 minutes to complete them.
  - Mostly multiple-choice questions
  - (Think of these as a substitute for in-class quizzes and exams.)

- Programming Assignments
  - Submission via Canvas
  - Can be done in a group of at most 4 students.
  - When working in a group, each member has to submit a copy of the assignment on Canvas. The submission can be exactly the same as the rest of the group, or you can make changes in your submission.
  - There might be dependencies between assignments.

General Advice

- Watch the videos, do not rely on just the slides.

- Start homework early.

- Make use of Piazza.
  There are no stupid questions
  (though there are questions that have already been asked, so please check before posting on piazza).

- Make use of online office hours.

- Start homework early.

General Advice

- Use Piazza to find group members.

- Use a private GitHub repository to coordinate on assignments.

- Do not cheat or plagiarize.

- Start homework early.
